

CS302 OS Assignment-2 Report

12312110 李轩然

DDL: Apr. 26 23:00

Time Spent: about 8h

Checkpoint 1

```
oslab@oslab-deb: /mnt/hgfs/assignment2-uaccess
skipped for hart 3
System has 1 cpus online

UART initied.
[INFO 0,-1] kpgmgrinit: page allocator init: base: 0xffffffffc080411000, stop: 0xffffffffc088000000
[INFO 0,-1] allocator_init: allocator mm initied base 0xffffffffd000000000
[INFO 0,-1] allocator_init: allocator vma initied base 0xffffffffd010000000
[INFO 0,-1] allocator_init: allocator proc initied base 0xffffffffd020000000
[INFO 0,-1] allocator_init: allocator kstrbuf initied base 0xffffffffd030000000
applist:
    init
    proctest
    sh
    test_arg
    test_malloc
    test_uaccess
[INFO 0,-1] load_init_app: load init proc init
[INFO 0,-1] bootcpu_init: start scheduler!
init: starting sh
sh >> test_uaccess 1
-> checkpoint 1 passed
sh > child 3 exit with code 0
sh >> █
```

Checkpoint 2

```
oslab@oslab-deb: /mnt/hgfs/assignment2-uaccess
skipped for hart 3
System has 1 cpus online

UART initied.
[INFO 0,-1] kpgmgrinit: page allocator init: base: 0xffffffffc080411000, stop: 0xffffffffc088000000
[INFO 0,-1] allocator_init: allocator mm initied base 0xffffffffd000000000
[INFO 0,-1] allocator_init: allocator vma initied base 0xffffffffd010000000
[INFO 0,-1] allocator_init: allocator proc initied base 0xffffffffd020000000
[INFO 0,-1] allocator_init: allocator kstrbuf initied base 0xffffffffd030000000
applist:
    init
    proctest
    sh
    test_arg
    test_malloc
    test_uaccess
[INFO 0,-1] load_init_app: load init proc init
[INFO 0,-1] bootcpu_init: start scheduler!
init: starting sh
sh >> test_uaccess 2
test write
-> checkpoint 2 passed
sh > child 3 exit with code 0
sh >> █
```

Checkpoint 3

```
oslab@oslab-deb: /mnt/hgfs/assignment2-uaccess
skipped for hart 3
System has 1 cpus online

UART inited.
[INFO 0,-1] kpgmgrinit: page allocator init: base: 0xffffffffc080411000, stop: 0xffffffffc088000000
[INFO 0,-1] allocator_init: allocator mm inited base 0xffffffffd000000000
[INFO 0,-1] allocator_init: allocator vma inited base 0xffffffffd010000000
[INFO 0,-1] allocator_init: allocator proc inited base 0xffffffffd020000000
[INFO 0,-1] allocator_init: allocator kstrbuf inited base 0xffffffffd030000000
applist:
    init
    proctest
    sh
    test_arg
    test_malloc
    test_uaccess
[INFO 0,-1] load_init_app: load init proc init
[INFO 0,-1] bootcpu_init: start scheduler!
init: starting sh
sh >> test_uaccess 3
-> kernel secret addr: 0xFFFFFFFFF8020E480
-> Your copy_from_user should not leak kernel data
-> checkpoint 3 passed
sh > child 3 exit with code 0
sh >> █
```

Checkpoint 4

```
skipped for hart 1
- booting hart 2: hsm_hart_start(hartid=2, pc=_entry_sec, opaque=1) = -3.
skipped for hart 2
- booting hart 3: hsm_hart_start(hartid=3, pc=_entry_sec, opaque=1) = -3.
skipped for hart 3
System has 1 cpus online

UART initied.
[INFO 0,-1] kpgmgrinit: page allocator init: base: 0xffffffffc080411000, stop: 0xffffffffc088000000
